

As per the news item on the VRHL website, final League positions have been calculated on a percentage points (% pts) basis.

This is calculated on total points won (3 for a win, 1 for a draw), minus any points deducted for rule breaches, divided by the total number of points available from the games played, expressed as a percentage.

For clarity:

$$\text{Percentage Points} = \left( \frac{\text{Points Accumulated}}{\text{Matches Played} \times 3} \right) \times 100\%$$
